DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 2-28-2000 complies with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. It has been placed in the application file, the examiner's initials have been provided for each citation, the document has been signed and dated, and the information referred to therein has been considered as to the merits.

Drawings

The drawings are objected to because figure 5 should include reference 50 to point out that the outer line rectangle represents the wireless LAN. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The use of the trademark Lucent Technologies' WaveLAN card has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4, 16-17 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuusela et al. (6,396,416 B1).

Kuusela et al. discloses a mobile phone (10) with circuitry for monitoring breathing activity and heart activity (see abstract).

Claims 1-4, 17-21 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Heinonen et al. (6,295,506 B1)

Heinonen et al. discloses a mobile phone (13) with circuitry for monitoring glucose (see abstract) and using the display (column5, lines 20-23).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karlsson et al. (6,038,469 A) in view of Matsumura et al. (6,161,036 A).

Karlsson discloses a LAN network having a transceiver and a receiver wherein ECG measurements are taken directly from leads to a monitor however does not disclose that the ECG signals are reflected from the subject, having a presentation device (figure 15 and 27). Matsumura et al. discloses a loop antenna that reflects form the subject for monitoring ECG signals (see abstract). Karlsson et al. would be able to substitute the wireless ECG sensors of Matsumura et al. to maintain a more efficient system of monitoring a patient.
